

ASSIGNMENT - LANDSCAPE

LANDSCAPE

Will not be accepted for a grade after the due date

Must be on the server in order for you to receive a grade

DESIGN

Create a landscape or cityscape in flash

Your design must make sense.

All objects must be created in flash.

DIMENSIONS

Ratio- 4:3

ANIMATION

At least one object in the piece needs to be animated.

Tweening Properties

Shape: Shape

Symbol: Motion

Each animated object must be on a separate layer.

The animated object(s) needs to move within the scene in addition to changes in shape or color .

The colors of the landscape should not remain static.

The piece can either loop or stop at the end of the animation, depending upon which you chose your choice should be logical.

Or it can loop from a specific frame

ADD STOP TO A FRAME

Select frame > menu > insert > keyframe

ADD the ACTION

menu > window > actions > make sure the frame is still selected > type in action box > stop();

LOOP FROM SPECIFIC FRAME

menu > window > actions > make sure the frame is still selected > type in action box > gotoAnd Play(15); (15 represent the frame number)

WEB

Your assignment needs to be positioned centered on the web page: center both vertical and horizontal

The background color of the page and the assignment need to be correct

There are sample pages provided

SERVER

Upload to school server as directed in class

Your Portal Page must contain a link to this project

TEST

Test the site to make sure that it works
